Main experiences

## Orange / VR developer

2017 - Present, Rennes (France)

<u>Friends Moments</u> (2021): VR multiplayer gaming/social Oculus Quest 2 application. Various games (3D pictionary, chess, darts, ...); ping-pong and tennis with homemade lag compensation. Made with Photon networking, and Ready Player Me avatars.

<u>Orange XR Design system</u> (2021): Unity package manager based networked VR interaction stack; based on homemade interaction stack, with Input system package and scriptables objects; Photon or MLAPI network. Available as a private scoped registry

VR pseudo-haptic force feedback for fencing (2019, personal project): prototype to feel the resistance of a saber they are holding in VR, without dedicated haptic hardware

Orange VR Collaboration (2017-2020): VR professional collaboration application (3D&2D drawing, miniaturization, agile boards, office decoration,...). Discord bot auth

## Orange / iOS developer

2009 - 2020, Lannion and Rennes (France)

TVCommande d'Orange (2013 - 2015): creator/dev/communication/support/backend of a popular (more than 1 million user) TV set-top-boxes remote control application

Au Petit bonheur la VOD (2016): serendipitously browse VODs in unusual & social ways

iNoco (2014 - 2018, personal product): access the french TV channel Nolife's VODs

Radio 140 (2014): listen to your Twitter feed "eye-free", played as a radio

SubtleStudy (2013): learn foreign languages with synchronized subtitles and dictionaries

## Orange / Senior developer

2004 - Present, Lannion and Rennes (France)

<u>Orange Expert Software</u> (2014 - 2019): Member of the internal software expert community (100 people in the Orange group). Leader of mobile and user experience groups. Major contribution in defining software jobs and learning cursus.

**Education** 

ENSSAT / Diplôme d'ingénieur

2001 - 2004, Lannion (France)

**Awards** 

Orange Bravo 2013 - Primezone Cup 2013
